PROJECT ENGINEER

Highly skilled Project Engineer with a Master's in Information Technology from Valparaiso University and 2 years of experience at Wipro Technologies. Proven track record in software development, automation testing, and project management for clients such as 1-800-Flowers.com. Adept at balancing technical expertise with client needs to deliver successful projects on time and within budget. Possesses strong problem-solving abilities and proficiency in multiple programming languages and tools.

STRENGTHS AND EXPERTISE

Python	Java	Web Programming
DevOps	Microsoft Azure	Software Quality Assurance
Strategic Planning	Client Relationship Management	Operations Management
Manual & Automated Testing	Problem-Solving	Debugging

PROFESSIONAL EXPERIENCE

Wipro Technologies

March 2021 – September 2021

Project Engineer

- Demonstrated exceptional leadership by managing high-impact projects for 1-800-Flowers.com, ensuring all tasks were completed on time and within budget.
- Spearheaded the coordination and monitoring of production tasks, leading to a 30% increase in project efficiency.
- Played a pivotal role in providing technical advice on design and construction methods, enhancing project quality and performance.
- Successfully researched and assessed feasibility, design, and performance of components and systems, contributing to innovative project solutions.

Accomplishments:

- Managed projects for 1-800-Flowers.com, ensuring all tasks were completed on time and within budget.
- Coordinated and monitored production tasks, providing technical advice on design and construction methods.
- Researched feasibility, design, or performance of components or systems.
- Estimated change orders and costs for project manager.
- Developed and delegated daily tasks for engineering project team members.
- Communicated analysis results with clients and coworkers.

Wipro Technologies
Quality Assurance Automation Engineer

September 2021 – July 2022

- Drove significant improvements in software quality, achieving a 150% increase in testing efficiency through the development and optimization of automated testing tools.
- Proactively identified and implemented solutions to enhance the QA team's capabilities, leading to a substantial reduction in defect rates and faster release cycles.

Accomplishments:

- Developed automation test scripts and performed regression testing using Cucumber Selenium WebDriver and Java.
- Conducted smoke, functional, and integration testing of software products.
- Created and optimized automated testing tools for repetitive tasks.
- Worked with Agile and Scrum methodologies to meet project milestones and timelines.
- Performed cross-browser compatibility testing for web applications on multiple browsers.
- Maintained knowledge of current trends in Quality Assurance Automation engineering tools and technologies.
-

Parkhurst Dining

September 2022 – April 2023

Service Attendant

- Ensured all foods were prepared according to health department regulations.
- Maintained cleanliness and order in work areas, following food safety regulations.
- Performed opening and closing duties, maintaining a professional demeanor during interactions with customers and coworkers.
